Vehicle emissions are a primary contributor to climate change and smog. Ratings are determined by the California Air Resources Board based on this vehicle's measured emissions.

GOVERNMENT 5-STAR SAFETY RATINGS

Overall Vehicle Score

Not Rated

Based on the combined ratings of frontal, side and rollover. Should ONLY be compared to other vehicles of similar size and weight.

|                                                                                                                        |                         |                        |
|------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------|
| Frontal Crash                                                                                                          | Driver Passenger        | Not Rated<br>Not Rated |
| Based on the risk of injury in a frontal impact. Should ONLY be compared to other vehicles of similar size and weight. |                         |                        |
| Side Crash                                                                                                             | Front seat<br>Rear seat | Not Rated<br>Not Rated |
| Based on the risk of injury in a side impact.                                                                          |                         |                        |
| Rollover                                                                                                               | Not Rated               |                        |
| Based on the risk of rollover in a single-vehicle crash.                                                               |                         |                        |

Star ratings range from 1 to 5 stars (★★★★★), with 5 being the highest. Source: National Highway Traffic Safety Administration (NHTSA). [www.safercar.gov](http://www.safercar.gov) or 1-888-327-4236
